OF THE PRODUCT

DUST TABLE LIFT

Dust Table Lift the dust suction bench with variable height.

The dust suction bench **Dust Table Lift** is indicated for the suctioning and removal of dust from sanding. The bench is built with galvanized press-folded sheet iron. The main feature of **Dust Table Lift** is the filtration of dust through aluminized polyester antistatic cartridges. Furthermore **Dust Table Lift** has the possibility to vary the working height by adjusting it using electric actuators.

Dust Table Lift is equipped with a timed self-cleaning system of the cartridges with jets of compressed air. The dust is deposited in 2 removable trays. The outgoing air is further filtered through acrylic fiber cells.
