OF THE PRODUCT

### **OVER**

**Over** the low dry painting booth.

The **Over** dry painting booth is suitable for suctioning and demolishing the pigments and fumes emitted from paint spray made with synthetic solvents, organic water. **Over** is built with modular panels of galvanized press folded sheet iron and its main feature is its small size that allows it to be placed in rooms with limited height. The **Over** painting booth uses an inertial cardboard filtering wall and a second filter with a "Paint Stop" filter.
