OF THE PRODUCT

TITANIUM

Titanium the dry painting booth with front wall and suction floor.

The **Titanium** dry painting booth is suitable for suctioning and demolishing the pigments and fumes emitted from paint spray made with synthetic solvents, organic water. The removal of the pigments and fumes occurs with a front wall and suction floor with inertial cardboard filter and a second filtration with "Paint Stop" filter drawers. **Titanium** is built with modular panels of galvanized press folded sheet iron.
